PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA: 8.86/10) with hands-on experience in Java, Python, JavaScript, and full-stack web development. Familiar with Data Structures Algorithms, DBMS, Operating Systems, and Computer Networks through coursework and project work. Passionate about building scalable applications and continuously learning new technologies.

EDUCATION

K L E F University, Andhra Pradesh, India

2023 – 2027 (Expected)

Bachelor of Technology in Computer Science (Honors)

CGPA: 8.86/10

Relevant Coursework: Data Structures Algorithms, Operating Systems, Database Management Systems, Computer Networks, Artificial Intelligence, Object-Oriented Programming

WORK EXPERIENCE

AI/ML Virtual Internship – Kodacy

Remote

Intern

Jul 2025 – Aug 2025

- **Predictive Modeling:** Designed and trained supervised classification and regression models on datasets exceeding 1,000 records; improved prediction accuracy by 15% over baseline benchmarks through systematic hyperparameter tuning and cross-validation.
- **ETL Pipeline Optimization:** Refactored ETL workflows and applied feature engineering techniques, reducing data preprocessing execution time by 30% and improving downstream model input quality.
- **Cross-Functional Collaboration:** Partnered with 3 team members across design and engineering to deliver project milestones on schedule; authored technical documentation to ensure smooth knowledge transfer and handover.

PROJECTS

[View Projects](#)

- **E-Commerce Platform (MERN Stack, MongoDB, AWS):** Engineered a production-grade full-stack e-commerce application featuring JWT-based authentication, RESTful API design, and AWS cloud deployment. Implemented server-side caching strategies that improved response times and reduced redundant database queries, increasing overall application throughput.
- **Real-Time Polling Platform (Node.js, WebSockets, MongoDB):** Architected a real-time polling system leveraging WebSocket protocol and event-driven architecture for low-latency communication. Implemented input validation and secure vote-handling logic to ensure data integrity under concurrent user load.
- **Restaurant Booking Platform (React.js, MongoDB):** Developed a full-stack reservation management system with real-time availability tracking, optimized MongoDB query performance, and a modular React.js component library integrated with a RESTful backend API.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Web Technologies: React.js, Node.js, Express.js, Django, HTML5, CSS3

Database Management: MongoDB, MySQL, Relational Database Design

Core Computer Science: Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks

Cloud and DevOps: AWS, Git, GitHub, Postman, VS Code

Software Practices: REST API Development, Code Review

Professional Skills: Analytical Thinking, Team Collaboration, Technical Communication, Adaptability, Time Management

CERTIFICATIONS

[View Certificates](#)

- **Salesforce Certified Developer:** Cloud application development, CRM platform customization, and enterprise software deployment on Salesforce.
- **Oracle Certified Associate – Database:** Relational database design, SQL programming, query optimization, and database administration fundamentals.
- **Automation Anywhere RPA Professional:** Automation 360 platform and robotic process automation for enterprise IT workflow digitization and process efficiency.
- **LinguaSkill English B2 – Cambridge English:** Internationally recognized B2 certification in professional English communication, reading, writing, and listening.

ACHIEVEMENTS

- **Rank 1 – KL University Hackathon (250+ teams):** Secured first place by designing and delivering an Inventory Optimization System that reduced simulated stock wastage by 35%; solution evaluated and selected by a panel of 5 industry professionals.
- **TCS CodeVita Season 13 – Round 2 Qualifier:** Advanced to Round 2 from a global pool of 100,000+ participants by solving complex algorithmic and data structure problems under strict time constraints, demonstrating strong competitive programming skills.
